International Undergraduate In Engineering

Single & Double Degree Program
**Why the International Undergraduate Program?**

Students who take joint degree programs are awarded a double bachelor degree from both Universities. The double degree program is designed for students to complete the last two to three years at FTU and the final one to two years in one of our partner universities.

Students are encouraged to consult with their academic counselor before applying on partner universities to spend one semester abroad. Students are required to spend a minimum of one semester in one of the many partner universities that the FTUI have jointly formulated and agreed to.

**Financially Efficient**

As the largest facility, FTU consists of 9 departments with 13 undergraduate programs and 2 master programs. Two professional programs and 12 doctorate programs. With over 73% of the academic staff and 50% of the students having an international educational background, FTU has had the opportunity to gain practical experience from many universities and partner institutions in South East Asia, and currently holds the title as receiving largest research funds in the university.

Students gain experience from an international exposure which will be an asset to their academic and professional career.

**International double degree program:**

International double degree program is relatively lower in expenses compared to directly studying abroad (almost 50% lower). Students with above average GPA (minimum 3.50) by the end of their 6th semester are eligible to apply for the Fast Track Program. The Fast Track Program in 2 years time (10 semesters).

Students who have completed 60 credits of their 120 credits curriculum of 144 credits (minimum GPA of 3.50) by the end of the 4th semester are eligible to apply for the Fast Track Program. The Fast Track Program (6 semesters) will be completed in 2 years time (10 semesters).

**Fast Track Program**

Students who take joint degree programs are awarded a double bachelor degree from both Universities. The double degree program is designed for students to complete the last two to three years at FTU and the final one to two years in one of our partner universities.

**Academic Requirements**

- Graduated from nationally accredited high schools.
- Completed General Certificate of Education (A Level), Advanced International Certificate of Education at a Pass level or above.
- Graduates of Diploma Program of European Baccalaureate.
- Passed the international education qualifications equivalent to any of the above.

**Language Requirements**

International Undergraduate Programs use English as the medium of instruction. For the degree completion, students are required to transfer to partner university, normally, at the final years of study.

**Admission Procedure**

For students who have Indonesian citizenship, there are two ways to apply for the international undergraduate program: Admission by invitation, [Talent Scouting] and by test, [SIMAK UI KI].

**SIMAK UI for Kelas Internasional**

SIMAK UI for KI (Kelas Internasional) is admission in the form of written test for future students of the International Undergraduate Program. Participant can only choose one study program from all available International Undergraduate Study Programs.

The test subjects for Faculty of Engineering includes: Mathematics for Natural Science, Biology, Chemistry, and Physics.

For further information on students application and admission, please contact:

**Students Admission Committee Universitas Indonesia**

The University Administration Center Building [PAU], Depok Campus, Depok 16424, West Java, Indonesia.

Phone : +62 21 78880139, Fax : +62 21 78880139

Admission information

[Online registration](http://penerimaan.ui.ac.id)
Talent Scouting

Each year, Universitas Indonesia invites the best students from all around Indonesia and other countries to join our International Undergraduate Program through the Admission by Invitation Program (Talent Scouting). Future students are considered based on both their academic and achievements as well as their school’s reputation. Those accepted through the Talent Scouting are not required to sit through a written test.

Step for Talent Scouting Registration

For School / Headmaster
1. Go to website: penerimaan.ui.ac.id/talentscouting
2. Complete the school details form
3. Create new registration, then complete the student information form for the students who are proposed for the talent scouting program.
4. Fill the student’s rank and scores
5. Give the user name and generated password to the student.

For Students
1. Go to website: penerimaan.ui.ac.id/talentscouting
2. Choose preferred program
3. Complete the registration form
4. Upload latest photo. The photo should be 400 x 600 pixels in size.
5. Pay the registration fee (Rp.1.300.000) using your registration number.
6. Upload requisite documents (all combined into a single PDF file):
   - Scanned copy of report pages from class 10, 11, and 12 which have been legalized including the page which contain student’s identity and score pages (semester 1-5).
   - Scanned copy of handwritten motivation statement.
   - Scanned copy of any academic achievements.
   - Scanned copy of TOEFL/IELTS certificate taken within the last year with a minimum score as follow: an ETS certified TOEFL (http://www.ets.org/) with a min score: PBT/IBT min.500, iBT min.61, CBT min.173 or IELTS (http://ielts.org/) with a minimum score of 5.5.
   - (Optional) Scanned document of any overseas college admission test that has been taken (SAT/ACT).

Selection Process
Universitas Indonesia will only process registrations which have been completed the registration form and have paid the registration fee. Selection is based on student performance and each school’s quota.

Conditions for Registration
If the student pass the talent scouting selection process, there should be 2 conditions
1. The student should have graduated from high school.
2. The student should have successfully passed the Ujian Nasional or A Level or IB Diploma.
3. The student should pass a report card verification process.

Admission Procedure for International Student

International applicants seeking admission to Universitas Indonesia must submit two sets of application containing Application Form and required documents to the International Office of Universitas Indonesia. The application form can either be downloaded at our website http://international.ui.ac.id or can be sent upon request.

Application Guide
- Download the application form
- Complete and sign the application form
- Attach the required documents applicable to your program and proof of application fee payment. (Please see Application Checklist section for Information regarding the application documents)
- Send the application to the following address:

International Affairs Office Universitas Indonesia
Central Administration Building, 1st Floor, Depok Campus
Depok 16424, West Java, Indonesia
Phone: +62 21 78880139  Fax: +62 21 78880139
Email: admission@ui.ac.id, io-ui@ui.ac.id
http://international.ui.ac.id

Available Scholarship*
Due to the long standing relationships between the Faculty of Engineering and our partner universities in Australia and to help motivate students to perform their best during their study in our partner universities, the following scholarships are available to all double degree program students continuing their study in Australia:

UQ - EAIT Scholarships:
AUD $ 10,000 for top performing engineering students for each study programs.

QUT Merit Scholarship:
25% reduction in tuition fees for the duration of their study for all students with a minimum GPA of 3.3 (out of 4.0 scale).

QUT Merit Plus Scholarship:
Additional 50% reduction in tuition fee for students with the highest GPA (two scholarships for Science and Engineering Faculty and two scholarships for Creative Industries Faculty).

Monash University Scholarship:
AUD $ 4,500 per semester for the first three semesters with additional AUD $ 4,500 for the last semester if they achieve a minimum of 80% average mark across their first three semesters in Monash.

* Subject to change based on partner university’s policy.
Civil Engineering

Civil Engineering is the oldest engineering discipline and has the widest coverage. Focusing on planning, design, construction and maintenance of world’s infrastructure, Civil Engineering is not just an applied-science, but relates with real life problem solving which affects to the quality of life in society.

Works that need the expertise of civil engineering varies such as: bridges, buildings and structures, power plants, sea ports and sea transportation channels, piping, roads, airports, transportation systems, dams, drainage systems, solid and liquid waste management systems and other uses. Civil engineers are employed to engage in planning, designing, constructing and maintaining structures and facilities all around the world.

Overseas Requirements

Eligible students can continue study to our partner university in Australia and Germany if the students fulfills the following requirements:

- Minimum GPA of 3.00 and 3.20 (for Monash University) at the end of the fourth semester (Australia) or sixth semester (Germany).
- Passed all required subjects with a minimum C.
- For students transferring to partner universities in Australia: Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >80 (IBT, with no bands lower than 20).
- For students transferring to UDE, Germany: A minimum of B1 level in Germany and TOEFL score >550 (paper based) or IELTS with a minimum overall score of 6.0 with no bands lower than 5.0.

Mechanical Engineering

Mechanical Engineering focuses on mechanics, design, materials, manufacturing, thermo fluids, tribology and engineering management, thinking engineers with strong fundamental engineering competence to analyze and to synthesize mechanical characteristics, to design and plan machines, mechanical devices, and to manage installations and production of machines.

Many graduates find employment as designers, consultants or project managers in industries associated with the use of natural resources, including defense, power generation, sugar refining, oil refineries, mining and manufacturing plants, automotive industries, petroleum and gas, heavy machineries and other institutions.

Overseas Requirements

A student at the International Program Department of Mechanical Engineering must complete and pass all subjects over their first four semester in FTUI before continuing to finish the last four semester in either our partner university. Students can also choose a full 4-year study in residence in the International Undergraduate Single Degree Program at UI, earning them a bachelor degree in engineering from UI.

Available partner universities for double degree program in Mechanical Engineering are: Queensland University of Technology, The University of Queensland, and Monash University, Australia.

Eligible students can continue study to our partner university in Australia if the student fulfills the following requirements:

- Minimum GPA of 3.00 or 3.20 (Monash University) at the end of the fourth semester.
- Passed all required subjects with a minimum C.
- For students transferring to partner universities in Australia: Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >80 (IBT, with no bands lower than 20).

Upon the completion of their studies in partner university, students will be awarded a Bachelor of Engineering degree from our partner university and a Sarjana Teknik degree when they return to FTUI and fulfill certain requirements.

civil.ui.ac.id

mech.eng.ui.ac.id
**Electrical Engineering**

Electrical Engineering provides a broad technical education and develops students' fundamental skills in electrical, electronics and computer engineering. Graduates are expected to be capable of analyzing and solving problems in the field of electrical, computer, control, electronics, telecommunication, and power engineering systematically, which are highly qualified to work in the telecommunication industry, information technology industry, electronics and power industry sectors.

A student at the of Electrical Engineering International Class must complete and pass all subjects over their first four semester in FTUI before continuing to finish the last four semesters in partner universities in Australia, or complete 3 years of study in FTUI and continue their study for one year in University of Duisburg Essen, Germany.

Students can also choose a full 4-year study in residence in the International Undergraduate Single Degree Program at UI, earning them a bachelor degree from Universitas Indonesia.

Available partner universities for double degree program in Electrical Engineering are: Queensland University of Technology, The University of Queensland, and The University of Duisburg Essen, Germany.

**Overseas Requirements**

Eligible students can continue study to our partner university in Australia and Germany if the students fulfills the following requirements:

- Minimum GPA of 3.00 at the end of the fourth semester (Australia) or sixth semester (Germany).
- Passed all required subjects with a minimum C.
- For students transferring to partner universities in Australia: Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >80 (iBT, with no bands lower than 20).
- For students transferring to UDE, Germany: A minimum of B1 level in German and IELTS score >550 (paper based) or IELTS with a minimum overall score of 6.0 with no bands lower than 5.0.

Upon the completion of their studies in partner university, students will be awarded a Bachelor of Engineering degree from our partner university and a Sarjana Teknik degree when they return to FTUI and fulfill certain requirements.

**Metallurgical & Materials Engineering**

Metallurgical & Materials Engineering aim to produce graduates who are able to select, process and control the properties of materials for given applications. Graduates will find themselves in a wide range of job options in Indonesia, Australia and all over the world. Job opportunities are in materials production and fabrication, public utilities, research and development, consultancy and design, education, technical sales and marketing. Other opportunities include trouble-shooting of production problems for a major manufacturer, supervise a research team developing new high performance components, become involved in local and overseas fieldwork examining corrosion in anything from oil rigs to large construction, or become an accredited welding inspector for various structures.

International Class curriculum is designed for 4 years of including those spent at the partner university. A student at the of Metallurgical & Materials Engineering International Class must complete and pass all subjects for their first four semester in FTUI before continuing to finish the last four semester in partner university.

Students can also choose a full 4-year study in residence in the International Undergraduate Single Degree Program at UI, earning them a bachelor degree from Universitas Indonesia.

Available partner universities for double degree program in Metallurgical & Materials Engineering are: The University of Queensland, Monash University, Curtin University, Australia and The University of Duisburg Essen, Germany.

**Overseas Requirements**

Eligible students can continue study to our partner university in Australia and Germany if the students fulfills the following requirements:

- Minimum GPA of 3.00 and 3.20 (for Monash University) at the end of the fourth semester (Australia) or sixth semester (Germany).
- Passed all required subjects with a minimum C.
- For students transferring to partner universities in Australia: Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >80 (iBT, with no bands lower than 20).
- For students transferring to UDE, Germany: A minimum of B1 level in German and IELTS score >550 (paper based) or IELTS with a minimum overall score of 6.0 with no bands lower than 5.0.

Upon the completion of their studies in partner university, students will be awarded a Bachelor of Engineering degree from our partner university and a Sarjana Teknik degree when they return to FTUI and fulfill certain requirements.
Architecture

Architecture Program Study produces graduates who have strong basic knowledge of architecture and its application, with the ability to apply responsive and environmentally friendly architecture design methods. Upon successful completion of the fourth year, students will be awarded Sarjana Teknik from UI and Bachelor of Design from QUT or Curtin University. They are eligible to enter postgraduate professional program leading to Master of Architecture accredited by RAIA.

Graduates of Architecture have the opportunity to work anywhere in the world from general practice or specialize in commercial, industrial or institutional developments, historic building conservation or housing renovation.

The aim in this undergraduate program is to graduate Bachelor in Architecture, who able to design architecture in the context of local needs and based on the application of basic theory, and knowledge of the architecture.

Our International Undergraduate Program in Architecture offers both a double degree program of 2 years in residence at Universitas Indonesia (UI) + 2 years at our partner university. Students can also choose a full 4-year study in residence in the International Undergraduate Single Degree Program at UI, earning them a bachelor of architecture degree from Universitas Indonesia.

Available partner universities for double degree program in Architecture are: Queensland University of Technology and Curtin University, Australia. We are currently in process of adding University of Queensland and Monash University as an option.

**Overseas Requirements**

Eligible students can continue study to our partner university in Australia if the student fulfills the following requirements:

1. Minimum GPA of 3.00 at the end of the fourth semester
2. Passed all required subjects with a minimum C.
3. Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >570 (paper based), 237 (computer based) or 80 (IBT, with no bands lower than 20).

Upon the completion of their studies in partner university, students will be awarded a Bachelor of Design/ Bachelor of Applied Science/ Bachelor of Architectural Design degree from our partner university and a Sarjana Arsitektur degree when they return to FTUI and fulfill certain requirements.

[architecture.ui.ac.id](http://architecture.ui.ac.id)

Chemical Engineering

Chemical Engineering provides a high-quality basic education in chemical engineering fundamentals to develop the skill required to apply these fundamentals to chemical engineering, processes and system whilst fostering student’s personal development. Chemical Engineering aim to produce highly competent chemical engineering graduates who are knowledgeable in basic chemical engineering prior to getting access to the field of chemical process technology.

A student at the International Program Department of Chemical Engineering - University of Indonesia must complete their first four semester in FTUI before continuing to finish the last four semester in one of the partner university. Students can also choose a full 4-year study in residence in the International Undergraduate Program at UI earning a bachelor of engineering degree from Universitas Indonesia.

Available partner universities for double degree program in Chemical Engineering are: Monash University, the University of Queensland, Queensland University of Technology and Curtin University (both Sarawak and Perth Campus), Australia.

**Overseas Requirements**

Eligible students can continue study to one of our partner universities in Australia if the student fulfills the following requirements:

1. Minimum GPA of 3.00 and 3.20 (for Monash University) at the end of the fourth semester.
2. Passed all required subjects with a minimum C.
3. Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >570 (paper based), 237 (computer based) or 80 (IBT for Monash & UQ, with no bands lower than 20 and writing no lower than 22) or 80 (IBT for Curtin, with no bands lower than 20).

Upon the completion of their studies in partner university, students will be awarded a Bachelor of Engineering degree from our partner university and a Sarjana Teknik degree when they return to FTUI and fulfill certain requirements.

In recognition of the special relationship between Monash Engineering and Universitas Indonesia, high achieving students in the 2+2 Undergraduate. The Monash Engineering degree is accredited by Engineers Australia. Students who successfully complete the 2+2 Program with a minimum of 70% are eligible to continue with Monash Engineering to undertake the Master of Advance Engineering (MAdvE - coursework), Master by Research or Ph.D program.

[che.ui.ac.id](http://che.ui.ac.id)
Industrial Engineering

Industrial Engineering Program Study focuses on the design, improvement and installation of integrated systems consisting of human, material, equipment and energy to specify, predict and evaluate the results obtained from an integrated system, therefore it takes knowledge and expertise in the fields of mathematics, physics and social science principles and methodology of engineering.

The international single degree program was established in 2015 as a response to the growing needs of future Industrial Engineers that has a unique combination of local wisdom with an international experience. For the program single degree program, students can design and choose their own study abroad program at any university that UI has academic cooperation. However, please be aware that not all institutions has an Undergraduate Industrial Engineering Program.

Recommended Partner Universities for Single Degree program includes:

1. Queensland University of Technology, Australia (Industrial Design)
2. University of Queensland, Australia (Business and Management)
3. University of Duisburg Essen / Universität Duisburg-Essen, Germany (Industrial Engineering)
4. Eindhoven University of Technology (TU Eindhoven) Department of Industrial Engineering & Innovation Sciences
5. TU Munich, Germany (School of Engineering)
6. TU Darmstadt, Germany (Industrial Engineering)

Starting in 2019, the double degree program with the Faculty of Business, Economic and Law, UQ is opened. Students must complete the first six semester in FT UI before continuing for another three semesters in UQ.

Upon completion of their study, students will be awarded a Bachelor of Business Management degree from UQ and a Sarjana Teknik degree when they return to FTUI and fulfill certain requirements.

Overseas Requirements

Eligible students can continue study to our partner university in Australia if the student fulfills the following requirements:
1. Minimum GPA of 3.00 at the end of the sixth semester
2. Passed all required subjects with a minimum C.
3. Minimum IELTS score of 6.5 with no bands lower than 6.0 or TOEFL score >80 (IBT, with no bands lower than 20).

Partner Universities

Monash University
Monash is ranked in the top one per cent of world universities — 80th in the world — according to the Times Higher Education World University Rankings (2017-2018). With students coming from 170 countries, and a presence in Australia, Italy, Malaysia, South Africa and China, students will benefit from a truly global education. Monash has achieved an enviable national and international reputation for research and teaching excellence in a short 50 years.

The university is also the highest ranked university for Engineering and Technology in Australia for 2017. Monash hosts some of the world’s most advanced engineering facilities, including the largest wind tunnel in the southern hemisphere, a next-generation immersive hybrid 2D and 3D virtual reality environment, and one of the world’s most powerful electron microscopes.

Curtin University
Curtin University is Western Australia’s largest and most multi-cultural university with a rich and diverse campus atmosphere that prepares the graduates to live and work in an increasingly global environment.

With more than 40,000 students, more than 9,700 are international students, Curtin offers a chance to establish personal and professional networks with people from around the globe. Curtin also has developed strong, long-term partnership with over 200 institutions in 39 countries. In 2017, the university was ranked top 400 in the world by Times Higher Education - QS World Ranking by Programs with its Engineering and IT ranked in 198 in the world.

Queensland University of Technology
Queensland University of Technology is a highly successful Australian university with an excellent graduate employment rate, global connections and a world-class record in applied research. With more than 650 undergraduate and postgraduate options, QUT has 40,000 students, including 6,800 international students from more than 90 countries and more than 100 current collaborative research projects presently being undertaken in more than 50 countries.

In 2017 QUT was ranked 24th (making it the second-highest ranked university in Australia) in the Times Higher Education 200 Under 50 rankings which showcases young universities that have achieved great successes in research and teaching. As well, QUT hosted the 2017 Times Higher Education Young Universities Summit which gathered representatives from the world’s best young universities to share insights and explore the challenges of tomorrow.
### The University of Queensland

The University of Queensland (UQ) is one of Australia’s premier learning and research institutions. It is the oldest university in Queensland and has produced almost 180,000 graduates since opening in 1911. UQ is one of the three Australian members of the global University 21 alliance and also the national Group of Eight (Go8).

UQ offers undergraduate and postgraduate programs that are informed by the latest research and delivered in state-of-the-art learning spaces with 43,731 students from more than 134 countries studying in its four main campuses in southeast Queensland: St Lucia, Ipswich, Gatton and Herston. Its 2,623 teachers have won more Australian Awards for University Teaching than any other Australian university. Today, UQ has 14 libraries with +2.5 million volumes, the university valued its multicultural community, which celebrates excellence in all aspects of scholarship.

### The University of Duisburg-Essen

The University of Duisburg-Essen (German: Universität Duisburg-Essen) is a public university in Duisburg and Essen, North Rhine-Westphalia, Germany and a member of the newly founded University Alliance Metropolis Ruhr. It was founded in 1654 and re-established on 1 January 2003 as a merger of the Gerhard Mercator University of Duisburg and the University of Essen. Until 1994 the name of the Gerhard Mercator University was Comprehensive University of Duisburg.

With its 12 departments and more than 39,000 students, the University of Duisburg-Essen is among the 10 largest German universities. Many international students study at the University of Duisburg-Essen and give the cities of Duisburg and Essen an international atmosphere.

### Deakin University

Deakin University is an Australian public university with approximately 53,000 higher education students in 2016. Ranked 5 stars for world-class facilities, research and teaching, as well as employability, innovation and inclusiveness.

Since 2016, Deakin has been ranked in the top 2% of the world’s universities in the Shanghai Ranking’s Academic Ranking of World Universities (ARWU), Times Higher Education and QS World University Rankings. Deakin ranks 16 in Australia, 18 in Oceania, and 350 in the world in the Webometrics Ranking of World Universities.
