

SMART CLASSROOM KAPAL API

Smart classroom is a technology-based class system with a goal to improve the quality of academic achievements. The classroom supports student-centred learning principle by actively engaging with the advancement of technology.

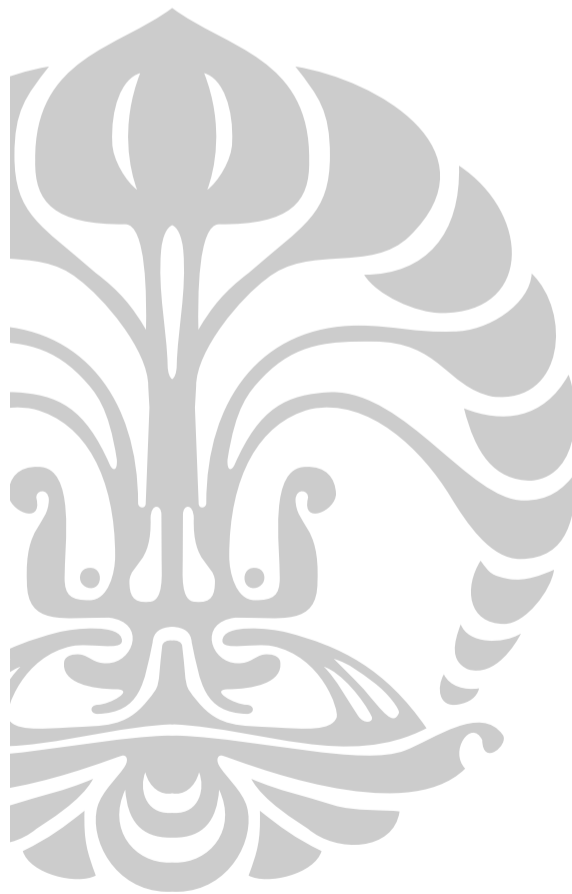

Universitas Indonesia—the Faculty of Engineering in particular—responds the above challenge by providing SMART CLASSROOM KAPAL API, where learning activities are enhanced through the utilisation of recent technologies. Such learning support, which has been adopted in various leading universities around the world, will mark Universitas Indonesia's commitment to provide the cutting-edge education.

THE SYSTEM APPLIED IN THE CLASSROOM

A COMMITMENT TO PROVIDE
THE CUTTING-EDGE ENGINEERING EDUCATION
